DETAILED ACTION

Allowable Subject Matter

1. Claims 1-15 and 18-47 are allowed over prior art of record. The following is an examiner's statement of reasons for allowance: UTI-T (International Telecommunication Union) discloses a VAD algorithm that makes voice activity decision every 10ms based on signal parameters: full band energy, the low band energy, the zero-crossing rate and a spectral measure. A set of differential parameters is obtained at each frame. These are different measure between each parameter and its respective long-term average. The initial voice activity decision is obtained using a piecewise linear decision boundary between each pair of differential parameters. A final voice activity decision is obtained by smoothing the initial decision (*referring to reference*). Manjunath et al. (US 6456964) teach a VAD method in that energy of upper-band and lower-band is computed including noise energy associated with upper-band and lower-band. A SNR ratio for upper-band and lower-band is computed and VAD decision is based on the SNR ratio (*referring to reference*). Both UTI-T and Manjunath et al. fail to specifically disclose the particular steps of determining a difference between an average ratio of energy above a first threshold frequency and energy below the first threshold frequency and a present ratio of energy above the first threshold frequency and energy below the first threshold frequency. And in response to the difference being exceeded by a first threshold or the difference exceeding a second threshold, indicating that the signal include a voice signal, wherein the second threshold is greater than the first threshold. Furthermore, it would have not been obvious to one of ordinary skill in the art at the time of invention to modify UTI-T and/or

Manjunath et al. in order to obtain the claimed invention. Therefore, claims 1-15 and 18-47 are allowed over prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
